

MobileHelp™

The Anywhere Help Button™

MobileHelp is the first and only **GPS/Cellular** Medical Alert Monitoring System.

Provides protection **beyond the home**, unlike current monitoring systems.

A beeper-size device with 24-hour, 2-way (**voice-to-voice**) Emergency Response.

Wherever you go (grocery store, doctor appointments, traveling in the car or vacationing)
MobileHelp is there.

At anytime, you can quickly **locate loved ones online** with real-time location data.
(Location displayed on Google Maps)

Caregivers receive instant text message or e-mail
if unit is activated and emergency services are needed.

Provided locally by Watson Funeral Home...
where you come to protect your loved ones not just memorialize them.

For additional information please call or visit us today.
